This summary is based on financial information available at the time of preparation and is unaudited. The table above only shows summarized data; details are depicted on the Tables 1 ó 7 as well as supporting tables that follow.

Total operating revenue achieved to date amounts to R167.8 million against a target of R226 million. This is equivalent to an underachievement of R58 million or 26%. Expenditure incurred year to date amounts R230.6 million excluding capital expenditure. A total percentage variance of approximately 18% results in an operating deficit of R35 million. However it must be noted that this is before incorporating expenditure on some of our accounting estimates ie provisions for long service award, post employment benefit and increase in receivables provision for impairment.

Capital receipts received to date amounts to R17.7 million which is as per the National Treasury payment schedule for 2013/14 financial year. The total spending on MIG funds in the 2012/13 financial year was 100% inclusive of committed funds and rolled-over funds from 2011/12 financial year; hence no application of MIG roll-overs was necessary into 2013/14 year end.

Debtors book remain very high as a result of balances accumulated from prior years. An impairment provision was raised at the end of June 2013 but no bad debts have been written off. There is, however, need to consider writing off some of these debts as it is highly unlikely that any recoveries will materialize. This includes approximately R25 million debt for services provided to the Municipal offices over the past years. Efforts are being made with the assistance of COGHSTA to try and recover all sector department debts and Government debts.

Details of the variances shown on the table above as well as tables that follow are explained in Table 8 on page 16.

#### **Deviation from and ratification of minor breaches of procurement process**

The deviations from, and ratification of minor breaches of the procurement process for the period to April 2014 as required in terms of subparagraph 36(1)(a) and (b) of the Supply Chain Management Regulations and Policy is herewith attached in Table 20 in this report.

An aggregate negative variance of 23% is largely contributed by an underachievement in basic services, however due to the seasonal demands of our services; we anticipate the trend to even out after the full calendar circle.

Overall, there is a general over spending of 18.1% on operating expenditure over the first month of the fourth quarter, it is worth noting that some of accounting estimates such as GRAP 25 provisions and Debt impairment and write off are subject to the necessary reviews and approvals and are not part of this report. However depreciation for the fourth quarter has been incorporated onto the financial reporting system.

Overall, the insignificant magnitudes of variances for both revenue and expenditure are expected, mainly due to the seasonal demand for basic services, we expect the trend to even out after the full calendar year.

The balance sheet size was evidenced by minor fluctuations in assets and liabilities components compared to prior year unaudited outcome. The increase in the net community wealth is mainly due to a revaluation of all Municipal assets as required by GRAP 17, the subsequent revaluation surplus (Accumulated Surplus) also saw our asset backed reserves increase with the same magnitude.

Receivables have increased due to low collection rates which average approximately 60%. This has a direct knock-on effect on our efficiency to service our creditors.

The Municipality's cash flow position is fairly healthy; however continuous efforts to improve the revenue collection rate and to broaden revenue streams through implementation of revenue enhancement plans continue to be pursued. The cash balances reflected above does not represent the bank balance at end of May, it contains valid reconciling items in the form of payments made to various suppliers in the month of April yet to be recorded on the system when Munsoft was closed. The bank balance amounted to R395798.89 at the end of May 2014.

**Table 8 MBRR SC1 Monthly Budget Statement – Material variances explanations – M11 May 2014**

Description	Variance	Reasons for material deviations	Remedial or corrective steps/remarks
<b>Revenue By Source</b>			
<i>Investment Income</i>		<i>The returns on investments are meager; this is also reflective of the magnitude of available funds for investing.</i>	<i>Alternative assets that could give a better return on our investment would be sought.</i>
<i>Other revenue</i>		<i>Projects such as parking fees, traffic fines etc are not performing as consistently to their potential.</i>	<i>Management to find a suitable ways to optimize revenue collection to out currently existing income generating projects and also find new sources thereon.</i>
<i>Basic Services</i>		<i>The variances noted on basic services after the first quarter of reporting are considered insignificant and merely represent the seasonal demand of the Municipal services from spring, summer and winter and a clearer trend will be analyzed over time.</i>	<i>None needed, performance is as forecasted.</i>
<i>Grants</i>		<i>Grants from National treasury were received as anticipated and communicated through the NT payment schedule for 2013/14.</i>	<i>None needed.</i>
<b>Expenditure By Type</b>			
<i>Accounting estimates</i>		<i>Deprecation was incorporated onto the financial reporting system. However, Grap 25 provisions are yet to included as the valuations are done annually.</i>	<i>The sizeable magnitude on depreciation would be rectified and aligned to our FAR during the Adj budget process.</i>
<i>Other expenditure</i>		<i>There is general saving on expenditure due to effective expenditure management.</i>	<i>None needed.</i>
<b>Capital Expenditure</b>			
<i>All</i>		<i>Our 2013/14 allocation of MIG was received during the last week of the month of July and we expect spending to improve during the second and third qtr.</i>	<i>Ring fencing of the MIG funds to commence in the second quarter to ensure effective management of funds for the intended purpose.</i>

## **Explanations of significant statistics**

### *Borrowing management*

Borrowing levels remain low, even lower than prior audited year, although expected to rise if the plans to acquire vehicles on vehicle finance proceed. Capital charges refers to total installment to repay loans (comprising of capital and interest portions) and this remains a very small proportion of total operating expenditure to date.

### *Safety of capital*

Municipal reserves remain greater than the liabilities as indicated by the low gearing level of only 5.6%. However the high level of unpaid creditors remains a threat to the overall debt to equity ratio. If compliance with section 65(2)(e) of MFMA is observed, this ratio could be managed within the acceptable range.

### *Liquidity*

The statistics indicate that the current assets are sufficient to cover current liabilities with more than the recommended (2;1 times). However it is important to note that if reconciling items are pushed through the cash book, this ratio may deteriorate. Also note that an increase in gross debtors to date has also contributed to the healthy liquidity, which may technically be doubtful.

### *Revenue management*

The municipality is not doing very well in this particular aspect because of two main issues namely;

- The accounting system in use (prior to February 2012) did not allow filtering and categorizing receipts per revenue source. This implies accuracy of reported figures on this financial indicator maybe compromised.
- The debtorsøcollection itself is generally low with debtors dating back from a decade ago. Approximately R88 million of the R142million of gross debtorsø book is more than 12 months old. This reduces the overall revenue collection rate to approximately 60%.

### *Creditors' management*

The creditorsøefficiency rate of 45% is below budget figures of 95% and efforts need to be put in place to comply with the MFMA as regards payment of creditors. This of course depends on revenue collection which is considered low as mentioned under revenue management above.

### *Water and electricity losses*

No accurate figures have been reported in this category as it is currently difficult to record losses. There are no meters that record units of either utility purchased and distributions. Figures reported in table 9 above are estimates based on invoices paid to utility providers as well as municipal billing system.
